THE OPPORTUNITY

COMPANY
HelioGrid AI

TAGLINE
Making industrial power grids more flexible with predictive optimisation.

SECTOR
Climate Tech / Industrial AI

HEADQUARTERS
Berlin, Germany

FOUNDED
2024

STAGE
Seed

FUNDING SOUGHT
EUR 2.4 million

PROBLEM
Factories waste capacity and face high peak-load charges because grid operations are reactive.

SOLUTION
Predictive control software forecasts loads and recommends flexible dispatch before peak events.

HOW WE WORK

PRODUCT

An API-first monitoring and optimisation platform integrated with industrial energy meters.

TRACTION

11 pilots, 4 paying customers, and EUR 38k monthly recurring revenue (founder-reported).

BUSINESS MODEL

Annual SaaS contract with installation fee and usage-based optimisation module.

MARKET

Founder-estimated EUR 4.1 billion European industrial energy software opportunity.

COMPETITION

Energy management software providers and in-house industrial automation teams.

THE TEAM AND THE ASK

TEAM

Dr. Mara Klein (former grid researcher) and Daniel Wu (industrial SaaS engineering lead).

RISKS

Long enterprise sales cycles, integration complexity, and unverified customer savings claims.

USE OF FUNDS

45% product development, 35% go-to-market, 20% security and integrations.

NOTES

All figures are invented for the synthetic demo; nothing here is investment advice.
