THE PROMISE

COMPANY
NovaSense Robotics

TAGLINE
Low-cost sensing for safer warehouse robots.

SECTOR
Industrial AI / Robotics

HEADQUARTERS
Hamburg, Germany

FOUNDED
2025

STAGE
Pre-seed

FUNDING SOUGHT
EUR 1.6 million

PROBLEM
Small logistics teams cannot afford advanced proximity sensing.

SOLUTION
Retrofit sensor kits for existing warehouse equipment.

THE STORY

PRODUCT

Low-cost sensor kit and fleet monitoring dashboard.

TRACTION

8 paid pilot customers in Germany (founder claim).

BUSINESS MODEL

Hardware starter kit plus annual fleet software subscription.

MARKET

Founders estimate a EUR 600m addressable segment.

COMPETITION

Premium industrial lidar and camera solutions.

A CLOSER LOOK

TRACTION

80 paying customers as of September (conflicting founder claim).

TEAM

Two robotics engineers and one logistics operator.

RISKS

Certification timelines and false-positive detection performance.

USE OF FUNDS

50% product certification, 30% pilots, 20% hiring.

NOTES

All claims and numbers in this deck are invented. The inconsistent traction figures are intentional.
